PRELIMINARY AMENDMENT

The present application is for reissue of the above-identified issued U.S. Patent No. 5,803,975. The errors which create the basis for this reissue application relate to the failure to claim the invention as broadly as the inventor was entitled to in view of his disclosure. Additionally, the Applicant in some instances failed to claim the invention as specifically as believed necessary to adequately describe the scope of his invention. Accordingly, Applicant seeks to add new claims to obtain claims of appropriate scope and asks that the application be amended as follows:
